PROFESSIONAL PROFILE

Software Engineering undergraduate at Obafemi Awolowo University with practical experience building web applications using HTML, CSS, JavaScript, React, Next.js and Node.js. Develops responsive interfaces, integrates APIs and connects user-facing features with application data. Placed 7th at the OAU Ontomorph Hackathon with Somamap, a health-focused web application. Seeking the Full-Stack Software Development internship at Clockwise Capital to contribute to real projects, strengthen full-stack engineering skills and learn within a collaborative team.

TECHNICAL SKILLS

- **Languages:** HTML, CSS and JavaScript.
- **Frameworks, runtime and styling:** React, Next.js, Node.js and Tailwind CSS.
- **Interface development:** Responsive layouts, mobile-first design, reusable components, navigation, forms and interactive UI behaviour.
- **Data integration:** REST API consumption, third-party SDK integration and browser-based localStorage persistence.
- **Development tools:** Git, GitHub and Visual Studio Code.

CORE STRENGTHS

- Builds functional prototypes under time constraints and adapts to unfamiliar tools through documentation and practical implementation.
- Connects interface decisions to user needs, with project experience in health, education and campus services.
- Explains technical work clearly through demonstrations, project documentation and presentations.
- Collaborates on shared projects and follows through on assigned responsibilities.

EDUCATION

B.Sc. Software Engineering — In Progress

Obafemi Awolowo University (OAU), Ile-Ife, Nigeria | 2024–Present

Relevant study areas: software engineering processes, computer science fundamentals, digital logic design, statistics and mobile application development.

PROJECT EXPERIENCE

Somamap — Symptom-Tracking Web Application | 2026

Solo Developer | OAU Ontomorph Hackathon
Live demo: somamap-nine.vercel.app

- Built a Next.js interface that allows users to record symptoms and view health information through a spatial body-map experience.
- Created mobile-first navigation and a dedicated landing page to introduce the product and guide users into the application.
- Integrated the Ontomorph DTP SDK and HOLON API to connect user actions with symptom data.
- Presented the application to hackathon judges; placed 7th overall and received a cloud subscription prize.

AfyaPulse — Citizen Health Reporting Interface | 2026

Developer 1 — Citizen App Lead | Team Project

- Works on the citizen-facing frontend for a health reporting and early-warning platform.
- Contributes to the application structure and UI components for citizen workflows, including onboarding, reporting, health records and alerts.
- Coordinates frontend responsibilities with teammates working on the health officer portal, backend and security integration.

GPA Tracker — Academic Tracking Web Application | 2026

- Built a JavaScript web application with academic analytics and charts.
- Developed a responsive landing page and footer, and refined the interface for mobile use.

FBS Study & Mock Defense Web Application | 2024/25

- Built an offline-capable static web application with Study, Exam, Mock Defense and Statistics modes.
- Integrated 90 quiz questions and 40 oral defense questions into a custom navy-and-gold interface.
- Used a no-dependency approach to support straightforward access and offline study.

Scientific Calculator — Coursework Application | 2026

- Built a scientific calculator interface with interactive calculation handling as a coursework project.

TRAINING & CONTINUED DEVELOPMENT

TechCrush — Tech4Africans Cohort 9 | 2026

Mobile Development Track

- Participates in structured mobile development training, with practical work using React Native and Expo.
- Applies component-based development and navigation concepts while continuing independent frontend web development.

ADDITIONAL TECHNICAL PROJECT

Smart Parking Management System | University Coursework, 2026

- Designed combinational and sequential logic for an automated parking system.
- Prepared technical documentation and circuit diagrams, demonstrating structured problem-solving and clear documentation.

LEADERSHIP & COMMUNITY

Secretary — Mentorship Circle

- Supports meeting documentation and records action items to help the group follow through on its commitments.

Award of Excellence — Best Project Student, Batch B | 2024/25

Foundation Bible School, MFM Campus Fellowship OAU

- Recognized for project work and completed the FBS Rain Semester programme.
- Participates in community activities alongside academic study and software development.

SECONDARY EDUCATION & RECOGNITION

Ife City College, Ile-Ife

- Received full WAEC examination sponsorship from TOKIMI Foundation in January 2023.

Earlier secondary education: Day Spring Academy, Gboko, Benue State.

PROFESSIONAL INTERESTS

- Responsive web applications and clear, usable interfaces for everyday problems.
- Health technology, educational tools and applications that improve access to services.
- UI/UX collaboration, frontend development practices and team-based product delivery.

ADDITIONAL INFORMATION

- English: fluent.
- Based in Ile-Ife; open to remote collaboration and relocation for internship opportunities.
